

Please replace the paragraph at page 13, lines 14-23²² with the following:

42
According to a first embodiment, an image is, as shown in Fig. 1 and Fig. 2, projected from an image projector 1 on the major surface of an optical screen unit 3. The optical screen unit 3 has an optical plate 7 and, for example, two optical sheets 5 and 6 supported on a frame member 4. The optical plate 7, which is rigid, is located on the side of the frame member 4 facing an observer. The two optical sheets 5 and 6, which are flexible, are brought into close contact with each other over the major surface of the optical plate 7.

And please replace the paragraph at page 22, lines 2-6 with the following:

43
The other ends of the resilient members 12a are fixed to two substantially central points on the short sides of the inner surface of the frame member 4. More particularly, tensile force is applied to the optical sheets rightward and leftward.
